

Enhanced File Transfer™ (EFT™)

Software Trusted by the U.S. Army and Fortune 100 Companies

Military-Grade MFT Security for Your Mission-Critical Data

Enhanced File Transfer™ (EFT™) software enables your organization to securely manage file transfers among worldwide offices, clients, and partners. EFT ensures the highest levels of compliance with government and corporate security policies and privacy regulations, including PCI-DSS, FIPS-140-2, HIPAA, and SOX. Globalscape's flexible platform allows you to customize a solution with modules and professional services that meet your specific requirements.

Customize and Scale the EFT Platform Exactly How You Need It

EFT is scalable by design. It has basic capabilities perfect for the small business owner who needs secure file transfer software. And because EFT is scalable, it can grow with your business. For the large enterprise, EFT has military-grade security along with amazing load capacity. Some of our largest clients transfer thousands of files per second using EFT. So from small businesses to large corporations, there is an EFT configuration that is perfect for you.

Key Features:

- HTTPS/SFTP(SSH)
- LDAP authentication
- CAC Enabled
- IPv6 Compatible
- Full support of FIPS 140-2
- Unique Folder Sweep Feature
- 2-factor authentication
- GUI-based advanced workflow
- Robust auditing and reporting
- And much more...

Key Benefits:

Easy to Install and Use

In some cases, you can be up and running in hours instead of days. Easy admin and end-user interfaces.

Multiple Deployment Options

On premises, hosted in the cloud or fully managed and hosted options available.

Customizable and Scalable

From the simple needs of small business to the mission-critical data moved by the world's top companies... EFT Server can be scaled for all.

Flexible Licensing Model

Don't get caught up in a rigid licensing model, you'll find ours easy and flexible.
