

PRESS RELEASE

‘Hack The Box’ Wins UK’s Most Innovative New Cybersecurity Company

UK’s Most Innovative New Companies in Cybersecurity Go Head-to-Head in National Competition

Richmond, Surrey, UK – 0900 hours, x April 2019 – Some of the brightest, most innovative and entrepreneurial cybersecurity companies in the UK went head-to-head last week in a bid to win the ‘Cyber Security Innovation Competition 2019’. The companies took part in ‘Pitchfest’, a series of brief pitches conducted in front of an esteemed judging panel, competing for a place in the Cyber Innovation Zone at this year’s Infosecurity Europe.

The event hosted by Ernst & Young is now in its fifth year and saw Hack The Box’, an online platform providing cyber security training crowned as the UK’s Most Innovative Small Cyber Security Company 2019.

The competition gave 20 small cyber security businesses the chance to present their new technologies in a series of two-minute pitches, followed by just two minutes of questions from the judging panel. From those pitches, 14 companies were shortlisted resulting in those companies receiving a stand in the Cyber Innovation Zone at Europe’s no. 1. information security event, Infosecurity Europe, taking place at Olympia, London, 4-6 June 2019. They will also be offered two x 15-minute speaking opportunities in the show’s Cyber Innovation Showcase theatre, with the potential to reach hundreds of information security professionals.

From the 14 shortlisted companies, just three went through to the final, with company representatives pitching additional information to compete for the ultimate prize. They were: ‘; ‘ULESKA’, a platform providing software security testing and risk analysis without the need for more personnel; and ‘Elemendar’, offering an artificial intelligence analyst for cyber threat intelligence, and the winners, Hack the Box.

James Hooker, the company’s Technical Director, was presented with a special award by one of the five judges, Dr Bernard Parsons MBE, CEO, Bcrypt.

Hooker said, “Everyone at Hack The Box are elated to have been selected as the winner of this award. We went in to the day to gain new contacts, to see what other innovators are bringing to the field, to show off what Hack The Box is offering to the community and what the future holds for Hack The Box. We came out with so much more. The quality of the pitches, of the event and the speakers completely blew us away. Hack The Box will strive to

live up to the standard that this award stands for, and look forward to engaging with DCMS and the field in general in the coming months.

Dr Parsons said, "Hack The Box' has been selected as the winner, due to an outstanding combination of innovation and vision, combined with a commitment to developing and supporting the infosecurity community."

Since winning the award in 2017, Tessian (formerly known as Check Recipient) has gone from strength to strength. The company pitched its Human Security Layer platform - a solution that uses machine learning to protect businesses from threats executed by people on email. In the last 12 months, Tessian has raised over \$50 million in funding and the platform is now used by hundreds of world-leading enterprises. Tim Sadler, CEO said, "Being named UK's Most Innovative Small Cybersecurity Company really helped us make our mark in the industry and bring to light how we can solve the problem of breaches caused by human error. The two years that followed have been phenomenal; we raised \$42m in Sequoia-backed funding, opened our offices in New York and grew our headcount 10 to more than 100." Tessian will be at Infosecurity Europe this year, on Stand B190.

In addition to the three finalists, the other shortlisted companies were Woot; Quadible; Human Firewall; Padlock; Tricerion; Titan IC; Qufaro; XQ Cyber; KeepNet Labs; Outthink; and Lujam. They will all present in the Cyber Innovations Showcase, at Infosecurity Europe.

Infosecurity Europe, now in its 24th year, takes place at Olympia, Hammersmith, London, from 4-6 June 2019. It attracts over 19,500 unique information security professionals attending from every segment of the industry, including 400+ exhibitors showcasing their products and services, industry analysts, worldwide press and policy experts, and over 200 industry speakers are lined up to take part in the free-to-attend conference, seminar and workshop programme - <https://www.infosecurityeurope.com>
