

Developed with our technical expertise and unique ethos, our trusted, innovative, and comprehensive Secudrive solutions deliver the three core advantages to implement and manage data security effortlessly and with confidence

### Powerful Functionality

The promise for protection of all types of data at rest and in use from external and internal threats

### Seamless Implementation

The foundation to help maintain existing IT environment and configurations for quick and simple deployment

### Simplified Management

The support to deliver confidence and convenience while in charge of business-wide data security

## Brand Profile

Secudrive is a brand of data protection solution, created by the Korean company Brainzsquare Inc.

(IT Infrastructure Management Solution)
- 2009  
Launched Secudrive (Data security solution)
- 2012  
Brainzsquare Inc. founded in San Jose, CA
- 2015  
Opened branch office in Japan

## Solutions

### Secudrive File Server

#### Secure File Sharing with Digital Rights Management (DRM) on File Servers or Cloud

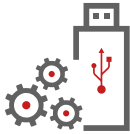

Protects your valuable, confidential data from leakage by managing user rights that allow employees to share and work internally for work productivity and collaboration

### Secudrive USB Basic

#### Hardware Encrypted USB Drive

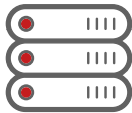

Offers a secure, mobile environment for employees to store and transport confidential files with portability and assured security, powered by AES-256 encryption and password protection

### Secudrive USB Office/CAD

#### Hardware Encrypted USB Drive with DRM for Business

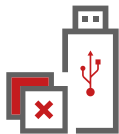

Provides a strengthened security for Secudrive USB Drive to allow employees to not only store but also use confidential files out of office, with the ability to stop copy, print, and screen-capture

### Secudrive USB Management Server

#### Centralized USB Drive Management

Facilitates a remote, centralized platform to manage multiple Secudrive Encrypted USB drives and their security policies for persistent data confidentiality and instant response to theft or loss

### Secudrive USB Copy Protection

#### USB Copy Protection for Secure Content Distribution

Helps customers to distribute valuable contents with digital rights management for copyright integrity and with remote update for cost-efficiency

### Secudrive Device Control

#### Endpoint Management for Data Loss Prevention

Prevents data leakage from the internal environments by regulating and monitoring the access to various ports such as USB, Wi-Fi, LAN, and IEEE 1394 on endpoint PCs

### Secudrive Sanitizer

#### Remote Disk Wiping Management

Provides an assured, cost-effective, and convenient data wiping on PCs set for disposal or recycling, in order to prevent data leakage and recovery
