

INTEGRITY. COMMITMENT. EXCELLENCE

commissum
INFORMATION ASSURANCE

1.0 About

Commissum is a leading global cybersecurity and information Governance, Risk management & Compliance consultancy.

Founded in 2002, Commissum has grown organically and delivers its comprehensive suite of penetration testing, knowledge-based consultancy, cybersecurity training, managed security services and cyber incident response services from its offices and Security Operations Centres across the UK, Europe and Malaysia.

A founder member of the Council of Registered Ethical Security Testers (CREST) Commissum has been a beacon of cybersecurity innovation since its beginnings.

Commissum is an independent organisation and does not resell software or technology. Our independence means our clients' best interests are at the heart of everything we do. Led by our corporate values of Integrity, Commitment and Excellence, Commissum's clients benefit from our unique and high value approach to serving them.

As a well-established and fast growing tech company, Commissum leverages its innovative solutions and world class consultants to drive down cyber risk and increase ROI on cybersecurity investments for its clients. Combined with our suite of certifications, management systems and processes, and, backed up by our case studies, references and testimonials, our clients can be confident that Commissum is the natural choice partner for any security engagement.

2.0 Services

Commissum provides a suite of solutions that work together in a complementary fashion meaning you can select a single service or choose Commissum as your fully outsourced managed security partner knowing you will get the same, outstanding level of service every time.

2.1 Technical testing and assessment

Test and verify security controls ranging from technical to procedural to human behavioural. Our services span the entire complexity and exploitation spectrum from low impact scanning to assessment of highly mature security through our Advanced Persistent Threat (APT) simulation and Red Team testing services.

- External and internal network and infrastructure penetration testing
- Web and mobile application vulnerability assessment and penetration testing
- WiFi network testing
- Configuration and architecture review
- Source code review
- Social Engineering, APT simulation and Red Team testing
- Vulnerability research
- Fully managed testing and technical assurance programs

2.2 Consulting

Commissum's highly experienced Subject Matter Experts are able to assist with the entire spectrum of information security, governance, risk management and compliance requirements. This ranges from simple project based engagements or auditing to highly integrated outsourced CISO services.

- Standards (ISO 27001, PCI DSS, etc..) implementation and compliance consulting
- Information Security Governance, Risk Management & Compliance (GRC) consulting
- Data Protection consulting
- Technology selection
- Outsourced CISO, ISO, Data Protection Officer services

2.3 Education and Mentoring

Commissum's training delivery team members are able to deliver a range of bespoke or off the shelf courses. Able to deliver complex global programmes combining eLearning, face to face classroom learning and mentoring to highly specialised, bespoke courses and knowledge transfer programmes for specific groups.

- Information Security Awareness
- Cyber Incident response -technical
- Cyber Incident Response – C-Suite and senior management
- Vulnerability scanning tools training
- ISO Mentoring

2.4 Cyber Incident Response services

If you suspect a cyber incident or data breach has occurred and you need a team of experts to investigate, manage and remediate the incident, Commissum is available 24/7 to provide forensic analysts, expert witnesses and senior incident managers to take care of everything from working with victims, the authorities, the press, third party stakeholders such as regulators as well as managing internal communications allowing business to return to normal operations and continue quickly.

- 24/7 telephone and onsite response
- Forensic/technical response
- Senior Incident Managers

2.5 Managed security services

Commissum provides a range of fully managed security services allowing 24/7 real time management and monitoring of network perimeter and internal networks providing a complete and single pane view of Indicators of Compromise before they manifest.

Additionally, our outsourced testing and assurance programmes provide the complete service any enterprise may require of a security partner.

- Managed Detection and Response (MDR) using own Security Information and Event Management (SIEM) platform from our UK 24/7 Security Operations Centre (SOC)
- Managed Firewall Service
- Managed Domain and Reputation Abuse Monitoring Service (DRAMS)
- Managed penetration testing and scanning
