

STEALTHbits

TECHNOLOGIES

Protecting Credentials and Data – Your Most Vulnerable Targets

Nearly every breach starts with an attacker compromising credentials in order to gain access to data. Their goal is to monetize, exploit or destroy this data.

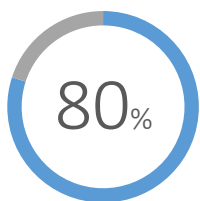

STEALTHbits Technologies is a cybersecurity software company focused on protecting an organization's sensitive data and the credentials attackers use to steal that data.

By removing inappropriate data access, enforcing security policy, and detecting advanced threats, we reduce security risk, fulfill compliance requirements and decrease operations expense.

Where STEALTHbits Fits In

IAM

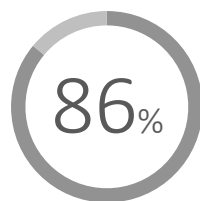

Missing 80%

IAM programs are incomplete without the inclusion of unstructured data (80% of all data), made possible with STEALTHbits.

On-Prem & Cloud

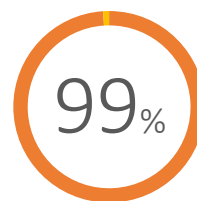

Data Access
86% Overreach

Access to on-prem data is drastically over-provisioned, which compounds when organizations move data to the cloud. STEALTHbits governs access to data in all environments.

SIEM

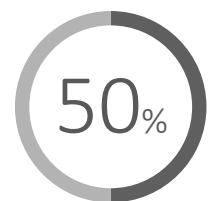

Missing 99%

SIEM is largely blind in the two places every attacker targets; Active Directory and Unstructured Data repositories. STEALTHbits uniquely fills this gap.

PIM

Missing 50%

PIM solutions can't protect what they don't know about. STEALTHbits identifies all privileged accounts and enforces PIM's control

STEALTHbits Product Portfolio

Product	Purpose
 StealthAUDIT®	GOVERN ACCESS TO DATA <i>Management and control over access to structured and unstructured data, systems, and critical applications</i>
 StealthDEFEND®	DETECT, PREVENT AND RESPOND TO THREATS IN REAL TIME <i>Real-time threat analytics and response platform leveraging machine learning</i>
 StealthINTERCEPT®	ENFORCE SECURITY POLICY <i>Visibility and enforcement of credential and data security policy</i>
 StealthRECOVER®	ROLLBACK AND RECOVER CHANGES TO ACTIVE DIRECTORY <i>Rollback of undesired changes and recovery of deleted objects without downtime</i>

Supported Platforms

 Microsoft Active Directory	 Azure Active Directory	 Microsoft Office 365	 Dell EMC
 NetApp	 Hitachi	 Nasuni	 Box
 Dropbox	 Windows File Systems and OS	 SharePoint	 Exchange
 Unix/Linux File Systems and OS	 Oracle	 SQL
