# Cyber Resilience in the Legal Sector

Commissum work as partners to several legal sector organisations, law firms and solicitors, providing a range of tailored cybersecurity services.

This experience gives us unique insight and expertise into the challenges for organisations in the legal sector. Be it governance and leadership, protection from threats, or detection and incident response, no matter what your requirement or stage of cyber maturity – we've got you covered.

The legal sector faces a growing challenge to meet client demand for assurance against a constantly evolving cyber threat. strong cyber resilience is no longer a luxury, but a requirement. Security must be optimised to

keep your firm ahead of emerging and evolving threats and respond to these as they impact on your organisation.

## Cyber Risk Identification & Management

You need a cybersecurity strategy that is tailored to you, with a bespoke roadmap of security controls to protect against and deal with current and developing cyber risks and threats. We create one by continuously assessing your cyber risks to understand and identify specific threats and vulnerabilities; your highest risk areas, and how to fix them.

Whether you wish to offer clients a new application for accessing their data, a change in supplier, or frontline staff training, our suite of managed services – encompassing managed testing, consultancy, training and detection - make everything possible to deliver securely.

- Cybersecurity needs to be owned at Board level. **We make it happen.**
- Correctly identifying and managing cyber risk can be a challenge. Our experienced eyes help you spot and manage risk.
- We protect your information through a range of policy, process, technology and people-centric controls.
- Enhanced Incident Response capability—cut response times and you cut the cost of a breach.
- Understand how your organisation resists & responds to lifelike attack scenarios.

## Protection

Are your current security controls working together? Bring all your security controls together with a bespoke and cohesive Information Security Management System, providing you with a holistic approach to managing and measuring your cyber risks. Ensure continual effectiveness of protective measures on your assets with our ongoing processes to measure and test your controls.

## Detection

A fact of modern connected systems is that they greatly increase the risk of perimeter breaches, making them an inevitable risk of working today - with time to detection a critical factor in reducing impact and financial loss. Commissum's fully managed Security Information and Event Management (SIEM) service reduces detection time from a matter of months to minutes.

Our UK-based Security Operations Centre (SOC) specialists monitor your network and machine data, triggering an alert if abnormal behaviour or an Indicator of Compromise is detected, all at machine speeds allowing rapid response to stop threats inside the network before they cause damage or exfiltrate data.

## Incident Response

Optimise your firm's return to normality from a breach; combine our SIEM service with Cyber Incident Response and Business Continuity consulting to effectively manage and recover. Have technical first responders on site to triage and contain breaches, while our virtual

### Our UK-based SOC

specialists monitor your network, alerting you to abnormal activity.

CISOs deal with the authorities, regulators and to communicate with victims and the press whilst working with any other third parties on your behalf, allowing you to focus on your business in critical situations and reduce the impact of a breach.

## Testing

Ensure the resilience of your systems and deal with weaknesses or evolving threats through regular testing. Commissum's CREST-accredited testing services, including managed ongoing testing and vulnerability assessments, ensure your technology and people are tested regularly.

Our testers are highly trained and think like attackers, stopping short of causing actual damage or disruption. They are up to date on the latest threats to the legal sector, giving you insight on how your organisation

would cope in a real attack scenario. We also offer intelligence-led penetration testing to provide a real world understanding of your organisation's resilience to threats.

**"We are lucky that we came across Commissum, who have been helping us meet our security challenge."**

BILLY KIRKWOOD, IT DIRECTOR AT BURNES PAULL
