

# What the press say...

“ While hardcore security is its primary selling point, the diskAshur<sup>2</sup> looks cool and can boast about high speeds as well. If data security is first and foremost in your mind, with local access and portability also must-haves, then the diskAshur<sup>2</sup> SSD encrypted portable SSD from iStorage is as good as it gets”

diskAshur<sup>2</sup> SSD | <https://www.forbes.com>

“ Is it the most secure portable hard drive ever made? I will venture the Carlsberg response: probably.”

diskAshur PRO<sup>2</sup> | PC Pro Magazine

“ Whereas the original was really secure, the new model is goddamn batshit crazy secure.”

diskAshur PRO<sup>2</sup> | <https://www.daniweb.com>

“ diskAshur's products are some of the best secure drives on the market, and the diskAshur PRO<sup>2</sup> is the company's best external hard drive yet. ”

diskAshur PRO<sup>2</sup> | <https://www.techradar.com>

“ While we're not outfitted, not by a long shot, to thoroughly test the security aspects of this drive, we can fully appreciate the testing procedure that has gone into making sure the data inside is as safe as it can possibly be. While doing research on what the different accreditations actually meant and how they impact things, we've truly begun to understand just how important data can be to some people. If you require absolute security in a classy and solid chassis, we can't see any other sensible option.”

diskAshur PRO<sup>2</sup> | <https://www.vortez.net>

“ The diskAshur<sup>2</sup> encrypted portable SSD from iStorage is designed to be that missing link – high capacity, high speed, hardware encrypted storage in a rugged and tamper-resistant case – the diskAshur<sup>2</sup> SSD is about as secure as it gets, short of locking your data in a bank vault. This is James Bond level protection and with pretty zippy speed.”

diskAshur<sup>2</sup> SSD | <https://geekdad.com>

“ If by any chance the above aren't enough for you then it's also worth pointing out that according to iStorage the diskAshur DT<sup>2</sup> is the only NCSC CPA, FIPS 140-2 Level 3, NLNCSA BSPA and NATO Restricted Level certified encrypted desktop hard drive currently available in the market something that we feel speaks volumes about the level of security you can expect from it for your sensitive data..”

diskAshur DT<sup>2</sup> | <https://www.nikktech.com>

“ The iStorage diskAshur PRO<sup>2</sup> describes itself as ‘the most secure external SSD in the world’ – and with good reason. I reviewed the previous model earlier in the year, and the latest model has a whole slew of government security certifications. I’ve tried this one for myself, and another improvement is you no longer need to specify a Mac version: it’s formattable out of the box. ”

diskAshur PRO<sup>2</sup> SSD | <https://9to5mac.com>

“ In summary, it can be said that iStorage has brought on the market the diskashur<sup>2</sup> a well-designed, flawlessly functioning and visually appealing niche product. The very secure encryption is second to none, high-quality design and the fact that the product is developed and built in Europe, relativize the price. ”

diskAshur<sup>2</sup> | <https://www.tech-review.de>

“ Time to wrap this insanely secure, encrypted external sold state drive. Does it command a premium? You betcha, it does!”

diskAshur<sup>2</sup> SSD | <https://www.hwhound.com>

“ It looks like something out of a movie, with the self-destruct feature, but it’s a pretty basic drive to use. The cool thing is, of course, the PIN authenticated feature. If someone tried to access it, he would have a pretty hard time. I think it’s pretty safe to say you’re safe with this drive.”

diskAshur<sup>2</sup> | <https://www.overclockersclub.com>

“ The diskAshur DT<sup>2</sup> would not look out of place in a bond movie but works as a standard external hard drive. The unit is solid with an excellent amount of storage on the unit. ”

diskAshur DT<sup>2</sup> | <https://techbuzzireland.com>

“ It is nigh on impossible to break into the drive without destroying it. iStorage have created a tamper proof design that covers the drive in order to discourage any disk brutality. I’m a firm believer in spending once and doing the job right over buying cheap and buying twice (potentially). ”

diskAshur<sup>2</sup> | <https://www.hwhound.com>
